Summary

Final-year Computer Science Engineering undergraduate with hands-on experience in software development, Python, Java, databases, and web applications.Foundations in problem solving, programming, database management, and application development, with project experience in AI-driven systems and data visualization. Familiar with Git/GitHub, AWS cloud fundamentals, and software development practices. Quick learner with strong teamwork, communication, analytical skills and enthusiastic open-source contributor.

Experience

Excelsoft Technologies Limited ,Mysuru **Sep 2026 – Present**
Junior Software Developer Intern *Mysuru, India*

- Currently working as a Software Intern, gaining hands-on experience in software development and application development.
- Contributing to development activities while following software development practices and collaborating with the team.

Education

Maharaja Institute of Technology, Mysuru **2023 – 2027**
Bachelor of Engineering, Computer Science – CGPA: 8.73 *Mysuru, India*

Sadvidya Semi-Residential College, Mysuru **2022 – 2023**
Pre-University (PCMC) – 84.16% *Mysuru, India*

Bharatiya Vidya Bhavan, Mysuru **2020 – 2021**
High School (SSLC) – 91.20% *Mysuru, India*

Projects

Voxsynth | *Python, AI Agents, Text-to-Speech* **Feb 2026**

- Built an autonomous multiplayer agent system that translates text to audio in real time across multiple languages simultaneously.
- Designed the agent pipeline to coordinate translation and speech synthesis with minimal latency for a seamless multiplayer experience.

Smart Faculty Feedback Portal | *JavaScript, Python, Web Development, Data Visualization* **Jan 2026**

- Designed a web application to simplify collection and reporting of faculty feedback for academic institutions.
- Enhanced decision-making for administrators through organized data visualization and analytics dashboards.

ZOO Database Management System | *JavaScript, Python, MySQL, Database Design* **Dec 2025**

- Developed a database-driven system that simplifies animal records, feeding schedules, and staff management for a zoo.
- Structured the database schema to streamline wildlife care administration and enable smarter, tech-driven operations.

Technical Skills

Programming Languages: Java, Python, C
Database: MySQL, SQL, MongoDB
Software Development: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving
Tools & Technologies: Git, GitHub, VS Code, Antigravity, Jupyter Notebook, Web Development
Cloud: AWS Cloud Fundamentals
AI/ML: Generative AI, AI Agents, RAG

Certifications & Courses

Introduction to Generative AI – 2026
Artificial Intelligence Fundamentals – 2025
AWS Cloud Practitioner Essentials – 2026
Programming with JavaScript – 2026
Certified in Java Language – Acube Tech Skills, Mysuru, India

Hackathons & Achievements

Innovostava 2026 – Runner-up
Hackverse 2025 – Participant
ARGHYA – Empowering Engineers with Next-Gen AI Tools – Participant
Be10x AI Tools Workshop – Attendee

Languages & Interests

Languages: English (Professional), Kannada (Native), Hindi (Limited)
Interests: Cricket, Kabaddi, Open Source Contribution
